

# Hirtshals

Vi i 1. C har været på introtur i Hirtshals. Byen Hirtshals ligger ved vestkysten i Vendsyssel, og hører ind under Hjørring Kommune.

Hirtshals er en fiskeriby med omkring 6000 indbyggere. Udover fiskeri er byen kendt for sine seværdigheder så som

Bunkermuseet, Hirtshals Fyr og Nordsøen Oceanarium. Hvis man ikke kan få nok af den friske, grønne natur, tilbyder Hirtshals rige muligheder for overnatning. Shopping og café-hygge er også en mulighed, hvis der er behov for afveksling. Hirtshals Havn sørger for, at du med færgeoverfart kan sejle til forskellige destinationer i Norge. Nyd den friske havluft og frihed – kom til Hirtshals.

## The North Sea Oceanarium

The North Sea Oceanarium is the biggest aquarium in northern Europe. The Oceanarium holds 4,5 million litres of water and 2000-3000 fish. There is a

large playground; for the smaller children there is a sandbox with toys and for the older children there is a slide and a climbing frame. There are two feedings in the Oceanarium. A seal feeding and the diver who feeds the fish in The Open Sea. The diver is carrying a video camera and a microphone, the video appears on a big screen, so you can look closely at the different kinds of fish.

At the Oceanarium we got a guided tour, where the guide told us about the different kinds of fish, their nature and their habits. We saw the two feedings, where they also told us about the fish and seals. At the place where the seals lived, there was an aquarium where you could go under and see the seals swim above you. We touched the fish in the padding pool. The Oceanarium was a dark place, where the aquarium was lighted up. It was quiet and there were a great atmosphere

## The Light House

The light house in Hirtshals was built in 1863, and is 35 metres high. There are 144 steps to the top of the tower. From the top of the tower, you have a great view over the ocean, the harbour, the town in general, and the bunkers from the 2. world war. The air was very refreshing at the top, and it was a great experience

# The cosy atmosphere

During the two days in Hirtshals, we enjoyed cosy times at the Hostel, and at the beach we had a lot of fun. At the beach the teachers had prepared a few songs for us, and we all enjoyed singing and being together.

Before we went to Hirtshals, we were told to bring something, which means something to us. A thing that brings back memories. We put the thing in a time capsule, and we are not supposed to open it before we graduate.

The atmosphere in Hirtshals was relaxing, and these two days made our relationship a bit closer.

## Das Bunkermuseum

Das Bunkermuseum wurde während des Zweiten Weltkrieges in Hirtshals erbaut. Es liegt in einem sehr großen Gebiet. Es gibt 54 verschiedene Bunker, zum Beispiel gibt es einen Bunker für die Mannschaft, einen für das Essen und einen für Munition. In dem Bunker ist es sehr muffig. Wir bekamen eine Führung. Sie war ein bisschen lang, aber sehr spannend. Das Wetter war ein bisschen kalt, aber es regnete nicht. Das Museum war auch ein spannendes Erlebnis.

Denne tur har for os i 1.C betydet, at vi er kommet tættere ind på hinanden. Turen har været utrolig lærerig og spændende. Der var en god balance mellem det faglige og det sociale på vores tur til Hirtshals. Gåturen på stranden med sang og dans viste en anden side af os alle, end den vi ser i undervisningen. Det har været godt for vores klasse med lidt afveksling fra den faglige skolegang. Hirtshals vil vi klart anbefale som en destination til introtur, da de har seværdigheder der understøtter det faglige og sociale. Vi håber på at kunne gentage en sådan tur igen i løbet af vores tre år på Brønderslev Gymnasium.
